I'm a Computer Science studnet with a solid foundation in JavaScript, specializing in React. Over the past year and a half, I've gained experience building functional UIs and integrating APIs for dynamic applications. While my projects are simple, I'm committed to continuous learning and expanding my skills, which also include basic experience with backend technologies like Node.js, Express, and SQL databases.

Skills

HTML5 and CSS3 expertise	▰▰▰▰▱
Javascript	▰▰▰▰▱
React	▰▰▰▱▱
State Management	▰▰▰▱▱
Understanding of Redux	▰▰▰▱▱
Express and Node.js	▰▰▰▱▱
TypeScript Familiarity	▰▰▱▱▱

My Projects

E-Com (Completed) TypeScript A frontend e-commerce project utilizing FakeStoreAPI, showcasing state management techniques with Redux, Redux Toolkit, and Context API. This project demonstrates practical skills in TypeScript and managing complex application states within a responsive interface.

Vision-UI Dashboard (Completed) JavaScript A custom-built version of the Vision UI Dashboard, created without using Material UI. This project involved replicating advanced UI components and layouts, enhancing proficiency in JavaScript and UI design principles.

Artist Management System (Ongoing) JavaScript A web application for managing users, artists, and songs, featuring role-based access control, CRUD operations through SQL, user authentication, and a dashboard for easy navigation and management.

Education

Expected in 2025-08	**Computer Science** *Kathmandu Bernhardt College - Bafal, Kathmandu*
2021-02	**High School Diploma** *Trinity International College - Dillibazzar, Kathmandu*
